Response to Arguments

Applicant's arguments filed 4/17/07 have been fully considered but they are not persuasive.

Regarding applicant's arguments with respect to claim 1, applicant argues that the laser driver integrated circuit (LDIC) of claim 1 is analogous to the "laser diode driver 302" of Kelly. The examiner concedes this fact. However, the applicant is arguing features of the invention that are recited in the preamble. Limitations in the preamble are not given patentable weight because it has been held that a preamble is denied the effect of a limitation where the claim is drawn to a structure and the portion of the claim following the preamble is a self-contained description of the structure not depending for completeness upon the introductory clause. Kropa v. Robie, 88 USPQ 478 (CCPA) 1951). Primary reference Kelly is relied upon to disclose the structural features (recited after the preamble) of claim 1. Next, applicant argues that the APC, ROPC and WSG are all on the same chip. Similar to the first argument, this feature is recited in the preamble and will not be given patentable weight. Futhermore, applicant argues that Kelly does not disclose where the LDIC of claim 1 is to be located on an optical pickup unit (OPU). Again, this feature is recited in the preamble and will not be given patentable weight for the reasons provided above.

Regarding claim 2, applicant argues that Kelly does not disclose wherein the plurality of components are within the same integrated circuit chip (i.e., the same LDIC). Similar to claim 1, the LDIC recited in claim 2, depends from the LDIC recited in the preamble in claim 1 and will not be given patentable weight.

Regarding claim 4, applicant argues that the component of claim 4 disclosed by Kelly are not all located on an optical pick-up unit. However, the feature of claim 4 is recited in the preamble and will not be given patentable weight because it has been held that a preamble is denied the effect of a limitation where the claim is drawn to a structure and the portion of the claim following the preamble is a self-contained description of the structure not depending for completeness upon the introductory clause. *Kropa v. Robie*, 88 USPQ 478 (CCPA 1951). Rather, Kelly is relied upon to disclose the structural features (recited after the preamble) of claim 4.

Regarding claim 5, applicant argues that Kelly does not disclose wherein the LDIC futher comprises a write strategy generator (WSG). However, Figure 8, Element 232 clearly discloses a WSG, which is a feature of the LDIC. Thus, for the reasons provided above, the previous rejections are maintained.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kelly et al (hereafter Kelly)(US PgPub 2002/0114244), as applied to the Non-Final Office Action dated 4/5/07.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas D. Alunkal whose telephone number is (571)270-1127. The examiner can normally be reached on M-F 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wayne Young can be reached on (571)272-7582. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
